

Kiosk Project - 23/11/2011

Rolling Messages

The screenshot shows the 'Saving Card' application window. The title bar reads 'Saving Card' and the menu bar includes 'Main', 'Report', 'Setup', 'Kiosk Mode', and 'Help'. The interface is divided into three main sections:

- Print / Eject Card:** A vertical stack of buttons labeled 'Message 1', 'Message 2', 'Message 3', 'Message 4', 'Money Redeemed', and 'Change Message'.
- Member Details:** A form with input fields for 'Name', 'Membership No', 'Card Value', 'Card Limit', and 'New Value'. Below these is a 'Redeem' button.
- Value Calculator:** A numeric keypad with buttons for digits 1-9, a decimal point, and a 'C' (clear) button.

The 'enterprise IT Ltd' logo is visible in the bottom left corner. The status bar at the bottom shows 'Printer Not Present ...' and 'COM3'.

This screenshot shows a different view of the application, likely during the initial card insertion phase. It features two main sections:

- Member Details:** A form with input fields for 'Name', 'Membership No', 'Card Value', 'Card Limit', 'Daily Limit', and 'New Value'. The 'enterprise IT Ltd' logo is at the bottom left.
- Instruction Area:** A large blue box with the text 'Please Insert Card To Begin'. Below this is an image of a card reader with an arrow pointing to it. To the right of the card reader is a graphic for 'Inchicore Credit Union Ltd' with contact information: 'Service Manager 0606-0000003', 'E-Stamp: #187', and 'Loan Protection Cover'.

At present, when the program is in **Kiosk Mode**, the first message, Message 1, is printed each time on the card. In effect, the other 3 messages are redundant and not being utilised. What we would like, is a rolling message print out. When the program is in Kiosk Mode, the messages from 1 - 4, will be printed in sequence, starting with message 1. Message 5, will be reserved for the redemption message.

Loan Protection Cover

At present, when the program is in *Kiosk Mode*, the *Daily Limit* is displayed, which is useful to the member. However, the *Daily Limit* is not shown in *Admin Mode*, which would be useful to both the member and the teller.

We therefore require the *Daily Limit* to be displayed in *Admin Mode*.
